

A late 19c. timber framed, weatherboarded, gabled and tiled detached wash house, with copper, chimney and sink. One corner partitioned off for an earth closet. Water came from a well by the house, or underground rainwater tank.

The earth closet has been converted into a W.C., with the door moved, and a window in its place. Partition of T. & G. boarding, with floor ceiling. 3" x 3" rafters with central tie beam only.
